Preventative Care Exam Recommendations

Thank you for allowing us to provide your pet's annual exam today.
Please answer the following questions so we can help with attaining a thorough exam for your pet.

- 1) Is your pet currently on any medication? Circle: **NO** / **YES** (if so, which medications and how often?)

- 2) Any issues with vomiting, diarrhea, appetite, activity level, behavior, urination, thirst or any other issues you would like to discuss with us today? Circle: **NO** / **YES** - if yes please explain:

- 3) Any significant weight loss or gain? Circle: **NO** / **YES** - if yes please explain:

- 4) Have you changed your pet's diet? Circle: **NO** / **YES** - if yes please explain:

- 5) Are you planning on grooming, boarding, traveling, visiting dog parks, or showing your pet within the next year? Circle: **NO** / **YES** - if yes please explain:

- 6) Have you or your neighbors noticed any fleas or ticks within the past year? Circle: **NO** / **YES** - if yes please explain:

- 7) Heartworm disease is not just a health concern for dogs, but cats as well. It is transmitted by infected mosquitoes.
 - Do you have a pool or live near free standing water? **NO** / **YES**
 - Do you go camping or traveling with your pet outside city limits? **NO** / **YES**
 - Do you travel with your pet outside of the state? **NO** / **YES**
 - Does your pet stay **any** length of time outside? **NO** / **YES**
 - Is your pet currently on heartworm prevention? **NO** / **YES**
- 8) Our doctors strongly recommend that all pets be on heartworm prevention year-round, are you interested in having a heartworm test performed today?
YES / NO - I am declining this medically recommended test.
- 9) Are you aware that many of the intestinal parasites that dogs and cats are infected with are transmissible to people, especially small children. Our doctors strongly recommend an annual fecal exam.
YES / NO - I am declining this medically recommended test.
- 10) At any age our doctors recommend annual blood testing to monitor your pet for internal illnesses, such as diabetes, liver disease, kidney disease and other metabolic problems that may not be apparent. It is also useful to establish a baseline of normal values for your pet. Would you like to have this performed today?
YES / NO - I am declining this medically recommended test.
- 11) Our doctors advocate good dental hygiene and care, Orastrips can detect the amount of periodontal disease present in your pet's mouth. Would you like to have this performed today?
YES / NO - I am declining this medically recommended test.
